

A method for treating or preventing a functional vitamin B12 deficiency in an individual and medical compositions for use in said method

Patent Number WO 2002087593 A1 7 November, 2002

PCT Int. Appl., 59 pp.

Abstract

A method and medical composition for the treatment and/or prevention of a functional vitamin B12 deficiency in an individual that is brought about as a consequence of oxidative stress on biochem. pathways. The functional vitamin B12 deficiency may eventually present as dementia, other neuropsychiatric abnormality and/or vascular disease. The method involves the administration of a medical composition that supplies a cobalt-sulfur bond in the upper β -ligand of an intracellular cobalamin mol. thereby facilitating intracellular processing of cobalamin. The cobalt-sulfur bond may be provided directly by administration of a thiolatocobalamin, such as glutathionyl-cobalamin or indirectly by the co-administration of vitamin B12 (or a derivative thereof) with a sulfur-containing mol., such as glutathione or a precursor thereof.
